EXPERIENCE

Inugo, Auckland — *Fullstack Developer*

APR 2018 - PRESENT

This is the first startup company I've been a part of in my professional career and I'm loving every minute of it. I've been an integral part of delivering Inugo's native mobile suite. My responsibilities include managing the Android aspect of the product and delivering features targeted to developers.

Dimension Data (NTT), Auckland — *Software Developer*

JAN 2015 - APR 2018

Working with the business applications team delivering commercial software and productionised web applications using dotnetcore, ReactJS, VueJS, NodeJS and Restify.

Dimension Data (NTT), Auckland — *Intern Developer*

JUN 2014 - JAN 2015

Internship with the business applications team working on 3 mobile apps, a web application and RESTful APIs (Expense Management System)

EDUCATION

MIT, Manukau — *Bachelor of Information Systems*

JAN 2011 - DEC 2014

Graduated from MIT with a Bachelor of Information Systems.

Home, Auckland — *Bachelor of Googling Stuff*

BEGINNING OF TIME - END OF TIME

I learned early on in my software development journey that Google basically has all the answers and that random internet guy knows more than me. I am very efficient at solving problems quickly using this degree.

DEVELOPMENT

JavaScript. NodeJS. RESTify.
SwaggerUI. HapiJS. Postman.
REST. HTML. CSS. C#.
dotnetcore. .NET. Java.
Android. Swift.
